

Safe Spaces & Crate Training

Your puppy is still very young and is learning about the world around them. Creating a safe space that they can retreat to and call their own will help your puppy feel secure and build their confidence. A crate is an excellent tool for creating a safe space and can be used for independent sleep and play, safety and travel, and even toilet training.

Creating a safe space

- ✔ Have your puppy's space set up when they come home for the first time.
- ✔ Your puppy's safe space is
 - For your puppy only and;
 - Never to be used for punishment or 'time out'.

- ✔ Consider the use of pheromones.
- ✔ If using a crate, always have the crate open and available for your puppy when confinement is not needed.

A PUPPY ONLY ZONE - YOUR PUPPY HAS ENTERED THEIR SAFE SPACE FOR A REASON. PLEASE DO NOT PULL THEM OUT OR GO INTO THE CRATE WITH THEM.

Introducing your puppy to their crate

If you wish to use the crate for confinement reasons such as safety, travel or toilet training please speak to your puppy school trainer.
